February / février

A. Yildirim, S.S. Jones, and T.D. Murray Mapping a gene conferring resistance to *Pseudocercosporella herpotrichoides* on chromosome 4V of *Dasypyrum villosum* in a wheat background **1**

M.A. Russell, L. Ostafichuk, and S. Scanga Lethal P-*lacZ* insertion lines expressed during pattern respecification in the imaginal discs of *Drosophila* **7**

T.F. Sharbel, D.M. Green, and A. Houben B-chromosome origin in the endemic New Zealand frog *Leiopelma hochstetteri* through sex chromosome devolution **14**

Y. Zhou, C.W. Magill, J.M. Magill, and R.J. Newton An apparent case of nonsymmetrical and sustained strand-specific hemimethylation in the *Dc8* gene of carrot **23**

B.K. Padhi, S.K. Ghosh, and R.K. Mandal Characterization of *Mbo*I satellites in *Cirrhina mrigala* and *Clarias batrachus* (Pisces) **34**

R.T. Chetelat, C.M. Rick, P. Cisneros, K.B. Alpert, and J.W. DeVerna Identification, transmission, and cytological behavior of *Solanum lycopersicoides* Dun. monosomic alien addition lines in tomato (*Lycopersicon esculentum* Mill.) **40**

A.L. Van Eenennaam, J.D. Murray, and J.F. Medrano Synaptonemal complex analysis in spermatocytes of white sturgeon, *Acipenser transmontanus* Richardson (Pisces, Acipenseridae), a fish with a very high chromosome number **51**

A.C. Cavell, D.J. Lydiate, I.A.P. Parkin, C. Dean, and M. Trick Collinearity between a 30-centimorgan segment of *Arabidopsis thaliana* chromosome 4 and duplicated regions within the *Brassica napus* genome **62**

A.R. Caetano and A.T. Bowling Characterization of a microsatellite in the promoter region of the IGF1 gene in domestic horses and other equids **70**

U. Willhoeft, J. Mueller-Navia, and G. Franz Analysis of the sex chromosomes of the Mediterranean fruit fly by microdissected DNA probes **74**

P.M. Borodin, M.B. Rogatcheva, A.I. Zhelezova, and S.-I. Oda Chromosome pairing in inter-racial hybrids of the house musk shrew (*Suncus murinus*, Insectivora, Soricidae) **79**

L.M. Kawchuk, J. Hachey, and D.R. Lynch Development of sequence characterized DNA markers linked to a dominant verticillium wilt resistance gene in tomato **91**

M. Ceccarelli, L. Morosi, and P.G. Cionini Chromocenter association in plant cell nuclei: determinants, functional significance, and evolutionary implications **96**

A. Orth, T. Adama, W. Din et F. Bonhomme Hybridation naturelle entre deux sous-espèces de souris domestique, *Mus musculus domesticus* et *Mus musculus castaneus*, près du lac Casitas (Californie) **104**

H. Zhu, E.J. Braun, J.L. Perry, and C.R. Bronson Identification, characterization, and mapping of *Ecm1*, a locus affecting extracellular matrix production and lesion size in *Cochliobolus heterostrophus* **111**

S. Svitashev, T. Bryngelsson, X. Li, and R.R.-C. Wang Genome-specific repetitive DNA and RAPD markers for genome identification in *Elymus* and *Hordelymus* **120**

F. Pelliccia, R. Barzotti, E.V. Volpi, E. Bucciarelli, and A. Rocchi Nucleotide sequence and chromosomal mapping of the 5S rDNA repeat of the crustacean *Proasellus coxalis* **129**

NOTES

K. Nagaki, H. Tsujimoto, and T. Sasakuma H genome specific repetitive sequence, pEt2, of *Elymus trachycaulus* in part of Afa family of Triticeae **134**

E. Gornung, I. Gabrielli, and L. Sola Localization of the $(TTAGGG)_n$ telomeric sequence in zebrafish chromosomes **136**

ERRATUM

S. Rahman, S. Abrahams, D. Abbott, Y. Mukai, M. Samuel, M. Morell, and R. Appels Erratum: A complex arrangement of genes at a starch branching enzyme I locus in the D-genome donor of wheat **139**

April / avril

Y.H. Zhang, V.S. Di Stilio, F. Rehman, A. Avery, D. Mulcahy, and R. Kesseli Y chromosome specific markers and the evolution of dioecy in the genus *Silene* **141**

M. Abadon, E. Grenier, C. Laumond, and P. Abad A species-specific satellite DNA from the entomopathogenic nematode *Heterorhabditis indicus* **148**

V. Dumas, S. Herder, A. Bebba, C. Cadoux-Barnabé, C. Bellec, and G. Cuny Polymorphic microsatellites in *Simulium damnosum* s.l. and their use for differentiating two savannah populations: implications for epidemiological studies **154**

V. Zoldoš, D. Papeš, S.C. Brown, O. Panaud, and S. Šiljak-Yakovlev Genome size and base composition of seven *Quercus* species: inter- and intra-population variation **162**

G.C. Manicardi, M. Mandrioli, D. Bizzaro, and U. Bianchi Patterns of DNase I sensitivity in the holocentric chromosomes of the aphid *Megoura viciae* **169**

K. Yonemori, S. Kanzaki, D.E. Parfitt, N. Utsunomiya, S. Subhadrabandhu, and A. Sugiura Phylogenetic relationship of *Diospyros kaki* (persimmon) to *Diospyros* spp. (Ebenaceae) of Thailand and four temperate zone *Diospyros* spp. from an analysis of RFLP variation in amplified cpDNA **173**

D.L. Nickrent and J.A. Patrick The nuclear ribosomal DNA intergenic spacers of wild and cultivated soybean have low variation and cryptic subrepeats **183**

L. Shen and L. Zhu Direct PCR-based genetic mapping of rice telomeric repeat associated sequences **193**

Z.-X. Lu, B. Sosinski, G.L. Reighard, W.V. Baird, and A.G. Abbott Construction of a genetic linkage map and identification of AFLP markers for resistance to root-knot nematodes in peach rootstocks **199**

F.S. Cheng, N.F. Weeden, S.K. Brown, H.S. Aldwinckle, S.E. Gardiner, and V.G. Bus Development of a DNA marker for V_m, a gene conferring resistance to apple scab **208**

M.T. Nieto-Taladriz, M. Rodríguez-Quijano, and J.M. Carrillo Biochemical and genetic characterisation of a D glutenin subunit encoded at the *Glu-B3* locus **215**

A. D'Hont, D. Ison, K. Alix, C. Roux, and J.C. Glaszmann Determination of basic chromosome numbers in the genus *Saccharum* by physical mapping of ribosomal RNA genes **221**

J. Hu, J. Sadowski, T.C. Osborn, B.S. Landry, and C.F. Quiros Linkage group alignment from four independent *Brassica oleracea* RFLP maps **226**

T.S. Warner, D.A.R. Sinclair, K.A. Fitzpatrick, M. Singh, R.H. Devlin, and B.M. Honda The *light* gene of *Drosophila melanogaster* encodes a homologue of *VPS41*, a yeast gene involved in cellular-protein trafficking **236**

S. Van Campenhout, R. Aert, and G. Volckaert Orthologous DNA sequence variation among 5S ribosomal RNA gene spacer sequences on homoeologous chromosomes 1B, 1D, and 1R of wheat and rye **244**

D. Gubb, A. Zacharopoulou, Y. Livadaras, P. Gourzi, J. Roote, and C. Savakis Recovery of a marked translocation strain that will facilitate the isolation of balancer chromosomes in the Mediterranean fruit fly, *Ceratitis capitata* **256**

A.L. Van Eenennaam, J.D. Murray, and J.F. Medrano Mitotic analysis of the North American white sturgeon, *Acipenser transmontanus* Richardson (Pisces, Acipenseridae), a fish with a very high chromosome number **266**

B. Liu, J.M. Vega, G. Segal, S. Abbo, M. Rodova, and M. Feldman Rapid genomic changes in newly synthesized amphiploids of *Triticum* and *Aegilops*. I. Changes in low-copy noncoding DNA sequences **272**

M.S. Röder, V. Korzun, B.S. Gill, and M.W. Ganal The physical mapping of microsatellite markers in wheat **278**

Y.F. Bogdanov, Y.S. Fedotova, S.P. Sosnikhina, V.G. Smirnov, S.Y. Dadashev, E.I. Mikhailova, and J.H. de Jong Bar- and thorn-like abnormalities in synaptonemal complexes of a mutant rye, *Secale cereale* **284**

W. Traut and B. Wollert An X/Y DNA segment from an early stage of sex chromosome differentiation in the fly *Megaselia scalaris* **289**

M.A. Kotarski, D.A. Leonard, S.A. Bennett, C.P. Bishop, S.D. Wahn, S.A. Sedore, and M. Shrader The *Drosophila* gene *asteroid* encodes a novel protein and displays dosage-sensitive interactions with *Star* and *Egfr* **295**

Z.-Q. Ma, A. Saidi, J.S. Quick, and N.L.V. Lapitan Genetic mapping of Russian wheat aphid resistance genes *Dn2* and *Dn4* in wheat **303**

K.M.F. Warpeha, T.J. Gilliland, and I. Capesius An evaluation of rDNA variation in *Lolium* species (ryegrass) **307**

June / juin

J.E. Conn, S.E. Mitchell, and A.F. Cockburn Mitochondrial DNA analysis of the neotropical malaria vector *Anopheles nuneztovari* **313**

F. Gallego, C. Feuillet, M. Messmer, A. Penger, A. Graner, M. Yano, T. Sasaki, and B. Keller Comparative mapping of the two wheat leaf rust resistance loci *Lr1* and *Lr10* in rice and barley **328**

B. Fenton, G. Malloch, and F. Germa A study of variation in rDNA ITS regions shows that two haplotypes coexist within a single aphid genome **337**

D.G. Peterson, W.R. Pearson, and S.M. Stack Characterization of the tomato (*Lycopersicon esculentum*) genome using in vitro and in situ DNA reassociation **346**

A.G.J. Kuipers, J.S. (Pat) Heslop-Harrison, and E. Jacobsen Characterisation and physical localisation of Ty1-*copia*-like retrotransposons in four *Alstroemeria* species **357**

D.E. Riechers, A. Kleinhofs, G.P. Irzyk, and S.S. Jones Chromosomal location and expression of a herbicide safener-regulated glutathione *S*-transferase gene in *Triticum aestivum* and linkage relations in *Hordeum vulgare* **368**

F. Han, A. Kleinhofs, S.E. Ullrich, A. Kilian, M. Yano, and T. Sasaki Synteny with rice: analysis of barley malting quality QTLs and *rpg4* chromosome regions **373**

A.J. Simmonds and J.B. Bell A genetic and molecular analysis of an *invected*^{Dominant} mutation in *Drosophila melanogaster* **381**

C.L. McIntyre and B.C. Winberg A rapid means of identifying wild rice species DNA using dot blots and genome-specific rDNA probes **391**

A. Akhmanova and W. Hennig *Drosophila melanogaster* histone H2B retropseudogene is inserted into a region rich in transposable elements **396**

L.E. Talbert, L.Y. Smith, and N.K. Blake More than one origin of hexaploid wheat is indicated by sequence comparison of low-copy DNA **402**

P. Besse and C.L. McIntyre Isolation and characterisation of repeated DNA sequences from *Erianthus* spp. (Saccharinae: Andropogoneae) **408**

M.P. Maguire and J.D. Jackson Two well-known mutants of chiasma maintenance function in maize are allelic **417**

M. Hosny, V. Gianinazzi-Pearson, and H. Dulieu Nuclear DNA content of 11 fungal species in Glomales **422**

J.B. Buntjer and J.A. Lenstra Self-amplification of satellite DNA in vitro **429**

J.M. McGrath and J.P. Helgeson Differential behavior of *Solanum brevidens* ribosomal DNA loci in a somatic hybrid and its progeny with potato **435**

K.R. Tiwari, G.A. Penner, and T.D. Warkentin Identification of coupling and repulsion phase RAPD markers for powdery mildew resistance gene *er-1* in pea **440**

L. Galgaro, C.R. Lopes, M. Gimenes, J.F.M. Valls, and G. Kochert Genetic variation between several species of sections *Extranervosae*, *Caulorrhizae*, *Heteranthae*, and *Triseminatae* (genus *Arachis*) estimated by DNA polymorphism **445**

G.-L. Sun, B. Salomon, and R. von Bothmer Characterization of microsatellite loci from *Elymus alaskanus* and length polymorphism in several *Elymus* species (Triticeae: Poaceae) **455**

NOTES

A.R. Leitch, K.Y. Lim, I.J. Leitch, M. O'Neill, M. Chye, and F. Low Molecular cytogenetic studies in rubber, *Hevea brasiliensis* Muell. Arg. (Euphorbiaceae) **464**

W.L. Greer, M.J. Dobson, P.E. Neumann, G.S. Girouard, S.M. Sparrow, and D.C. Riddell FISH mapping and inter-Alu fingerprinting define the YAC contig map around the centromeric region of human chromosome 18 **468**

D.D. Hegedus, T.A. Pfeifer, D.S. Mulyk, and G.G. Khachatourians Characterization and structure of the mitochondrial small rRNA gene of the entomopathogenic fungus *Beauveria bassiana* **471**

August / août

J.A. Dávila, M.P. Sánchez de la Hoz, Y. Loarce, and E. Ferrer The use of random amplified microsatellite polymorphic DNA and coefficients of parentage to determine genetic relationships in barley **477**

V.-M. Rokka, M.S. Clark, D.L. Knudson, E. Pehu, and N.L.V. Lapitan Cytological and molecular characterization of repetitive DNA sequences of *Solanum brevidens* and *Solanum tuberosum* **487**

N.J. Clegg, B.M. Honda, I.P. Whitehead, T.A. Grigliatti, B. Wakimoto, H.W. Brock, V.K. Lloyd, and D.A.R. Sinclair Suppressors of position-effect variegation in *Drosophila melanogaster* affect expression of the heterochromatic gene *light* in the absence of a chromosome rearrangement **495**

E. Drosopoulou and Z.G. Scouras The organization of the α-tubulin gene family in the *Drosophila montium* subgroup of the *melanogaster* species group **504**

J.T. Zhao, M. Frommer, J.A. Sved, and A. Zacharopoulou Mitotic and polytene chromosome analyses in the Queensland fruit fly, *Bactrocera tryoni* (Diptera: Tephritidae) **510**

A. Katsiotis, M. Hagidimitriou, A. Douka, and P. Hatzopoulos Genomic organization, sequence interrelationship, and physical localization using in situ hybridization of two tandemly repeated DNA sequences in the genus *Olea* **527**

B. Liu, J.M. Vega, and M. Feldman Rapid genomic changes in newly synthesized amphiploids of *Triticum* and *Aegilops*. II. Changes in low-copy coding DNA sequences **535**

V.T.K. Chow, K.M. Lim, and D. Lim The human *DENN* gene: genomic organization, alternative splicing, and localization to chromosome 11p11.21–p11.22 **543**

A.F. MacRae A pentamer-repeat-containing DNA sequence in Texas bluebonnet (*Lupinus texensis* Hook.) **553**

G.R. Brown, C.H. Newton, and J.E. Carlson Organization and distribution of a *Sau*3A tandem repeated DNA sequence in *Picea* (Pinaceae) species **560**

S.A. Jackson, M.L. Wang, H.M. Goodman, and J. Jiang Application of fiber-FISH in physical mapping of *Arabidopsis thaliana* **566**

M. Bercsényi, I. Magyary, B. Urbányi, L. Orbán, and L. Horváth Hatching out goldfish from common carp eggs: interspecific androgenesis between two cyprinid species **573**

Q. Chen, R.L. Conner, A. Laroche, and J.B. Thomas Genome analysis of *Thinopyrum intermedium* and *Thinopyrum ponticum* using genomic in situ hybridization **580**

D.D. Heath and T.J. Hilbish *Mytilus* protamine-like sperm-specific protein genes are multicopy, dispersed, and closely associated with hypervariable RFLP regions **587**

A. Esen and H. Bandaranayake Insertional polymorphism in introns 4 and 10 of the maize β-glucosidase gene *glu1* **597**

H.S. Judelson and T.A. Randall Families of repeated DNA in the oomycete *Phytophthora infestans* and their distribution within the genus **605**

O.V. Muravenko, A.R. Fedotov, E.O. Punina, L.I. Fedorova, V.G. Grif, and A.V. Zelenin Comparison of chromosome BrdU–Hoechst–Giemsa banding patterns of the A_1 and $(AD)_2$ genomes of cotton **616**

NOTE

W.Y. Cheung, R.K. Gugel, and B.S. Landry Identification of RFLP markers linked to the white rust resistance gene (*Acr*) in mustard (*Brassica juncea* (L.) Czern. and Coss.) **626**

October / octobre

O. Marescalchi, V. Scali, and M. Zuccotti Flow-cytometric analyses of intraspecific genome size variations in *Bacillus atticus* (Insecta, Phasmatodea) **629**

G. Genualdo, A. Errico, A. Tiezzi, and C. Conicella α-Tubulin and F-actin distribution during microsporogenesis in a 2*n* pollen producer of *Solanum* **636**

T.L. Parkes, K. Kirby, J.P. Phillips, and A.J. Hilliker Transgenic analysis of the cSOD-null phenotypic syndrome in *Drosophila* **642**

B.R. Baum and D.A. Johnson The 5S rRNA gene in sea barley (*Hordeum marinum* Hudson sensu lato): sequence variation among repeat units and relationship to the X haplome in barley (*Hordeum*) **652**

P. Deb, T.A. Klempan, R.L. O'Reilly, and S.M. Singh A single-primer PCR-based retroviral-related DNA polymorphism shared by two distinct human populations **662**

R.J. Singh, K.P. Kollipara, and T. Hymowitz The genomes of *Glycine canescens* F.J. Herm., and *G. tomentella* Hayata of Western Australia and their phylogenetic relationships in the genus *Glycine* Willd. **669**

T. Komatsuda, I. Nakamura, F. Takaiwa, and S. Oka Development of STS markers closely linked to the *vrs1* locus in barley, *Hordeum vulgare* **680**

F. Sacco, E.Y. Suárez, and T. Naranjo Mapping of the leaf rust resistance gene *Lr3* on chromosome 6B of Sinvalocho MA wheat **686**

M. Skarzhinskaya, J. Fahleson, K. Glimelius, and A. Mouras Genome organization of *Brassica napus* and *Lesquerella fendleri* and analysis of their somatic hybrids using genomic in situ hybridization **691**

J.J. Stuart, S.J. Schulte, P.S. Hall, and K.M. Mayer Genetic mapping of Hessian fly avirulence gene *vH6* using bulked segregant analysis **702**

J. Palyga and J.M. Neelin Isolation and preliminary characterization of histone H1.b allelic variants from quail erythrocytes **709**

P.-C. Shaw, A.F. Davies, K.-F. Lau, M. Garcia-Barcelo, M.M.-Y. Waye, S. Lovestone, C.C.J. Miller, and B.H. Anderton Isolation and chromosomal mapping of human glycogen synthase kinase-3α and -3β encoding genes **720**

M. Nieddu, G. Pichiri, P. Coni, S. Salvadori, A.M. Deiana, and R. Mezzanotte A comparative analysis of European and American eel (*Anguilla anguilla* and *Anguilla rostrata*) genomic DNA: 5S rDNA polymorphism permits the distinction between the two populations **728**

M.J. Goldenthal, J. Marin-Garcia, and R. Ananthakrishnan Cloning and molecular analysis of the human citrate synthase gene **733**

NOTE

A. Musio, P. Baroli, and I. Sbrana Primed in situ labeling (PRINS): a method for rapid identification and quantification of human chromosomes in both lymphocytes and sperm nuclei **739**

December / décembre

T. Yamada, K. Hosaka, N. Kaide, K. Nakagawa, S. Misoo, and O. Kamijima Cytological and molecular characterization of BC_1 progeny from two somatic hybrids between dihaploid *Solanum acaule* and tetraploid *S. tuberosum* **743**

A. Zambetaki, N. Pasteur, and P. Mavragani-Tsipidou Cytogenetic analysis of Malpighian tubule polytene chromosomes of *Culex pipiens* (Diptera: Culicidae) **751**

R. Cronn and J.F. Wendel Simple methods for isolating homoeologous loci from allopolyploid genomes **756**

J. Lima-Brito, H. Guedes-Pinto, and J.S. Heslop-Harrison The activity of nucleolar organizing chromosomes in multigeneric F_1 hybrids involving wheat, triticale, and tritordeum **763**

E.G. Boulding Molecular evidence against phylogenetically distinct host races of the pea aphid (*Acyrthosiphon pisum*) **769**

D. Carputo, P. Garreffa, M. Mazzei, L. Monti, and T. Cardi Fertility of somatic hybrids *Solanum commersonii* (2x, 1EBN) (+) *S. tuberosum* haploid (2x, 2EBN) in intra- and inter-EBN crosses **776**

W. Spielmeyer, M. Robertson, N. Collins, D. Leister, P. Schulze-Lefert, S. Seah, O. Moullet, and E.S. Lagudah A superfamily of disease resistance gene analogs is located on all homoeologous chromosome groups of wheat (*Triticum aestivum*) **782**

M.J. Harris and D.M. Juriloff Nonallelic noncomplementation models in mice: The first arch and lidgap-Gates mutations **789**

M. Hicks, D. Adams, S. O'Keefe, E. Macdonald, and R. Hodgetts The development of RAPD and microsatellite markers in lodgepole pine (*Pinus contorta* var. *latifolia*) **797**

S.M. Morroll and Z.A. Wilson *Arabidopsis* YAC restriction mapping **806**

M.A. Garrido-Ramos, D.T. Stewart, B.W. Sutherland, and E. Zouros The distribution of male-transmitted and female-transmitted mitochondrial DNA types in somatic tissues of blue mussels: Implications for the operation of doubly uniparental inheritance of mitochondrial DNA **818**

T.I. Axenovich, M.B. Rogatcheva, S.-I. Oda, and P.M. Borodin Inheritance of male hybrid sterility in the house musk shrew (*Suncus murinus*, Insectivora, Soricidae) **825**

J.Q. Liu and J.A. Kolmer Molecular and virulence diversity and linkage disequilibria in asexual and sexual populations of the wheat leaf rust fungus, *Puccinia recondita* **832**

J. Chu and D.J. Howard Genetic linkage maps of the ground crickets *Allonemobius fasciatus* and *Allonemobius socius* using RAPD and allozyme markers **841**

D. Zhang and T. Sang Chromosomal structural rearrangement of *Paeonia brownii* and *P. californica* revealed by fluorescence in situ hybridization **848**

K. Alix, F.-C. Baurens, F. Paulet, J.-C. Glaszmann, and A. D'Hont Isolation and characterization of a satellite DNA family in the *Saccharum* complex **854**

B.C. Clarke and R. Appels A transient assay for evaluating promoters in wheat endosperm tissue **865**

P. Lorite and T. Palomeque Effects of restriction endonucleases on nucleolar organizing regions in the ant *Tapinoma nigerrimum* **872**
